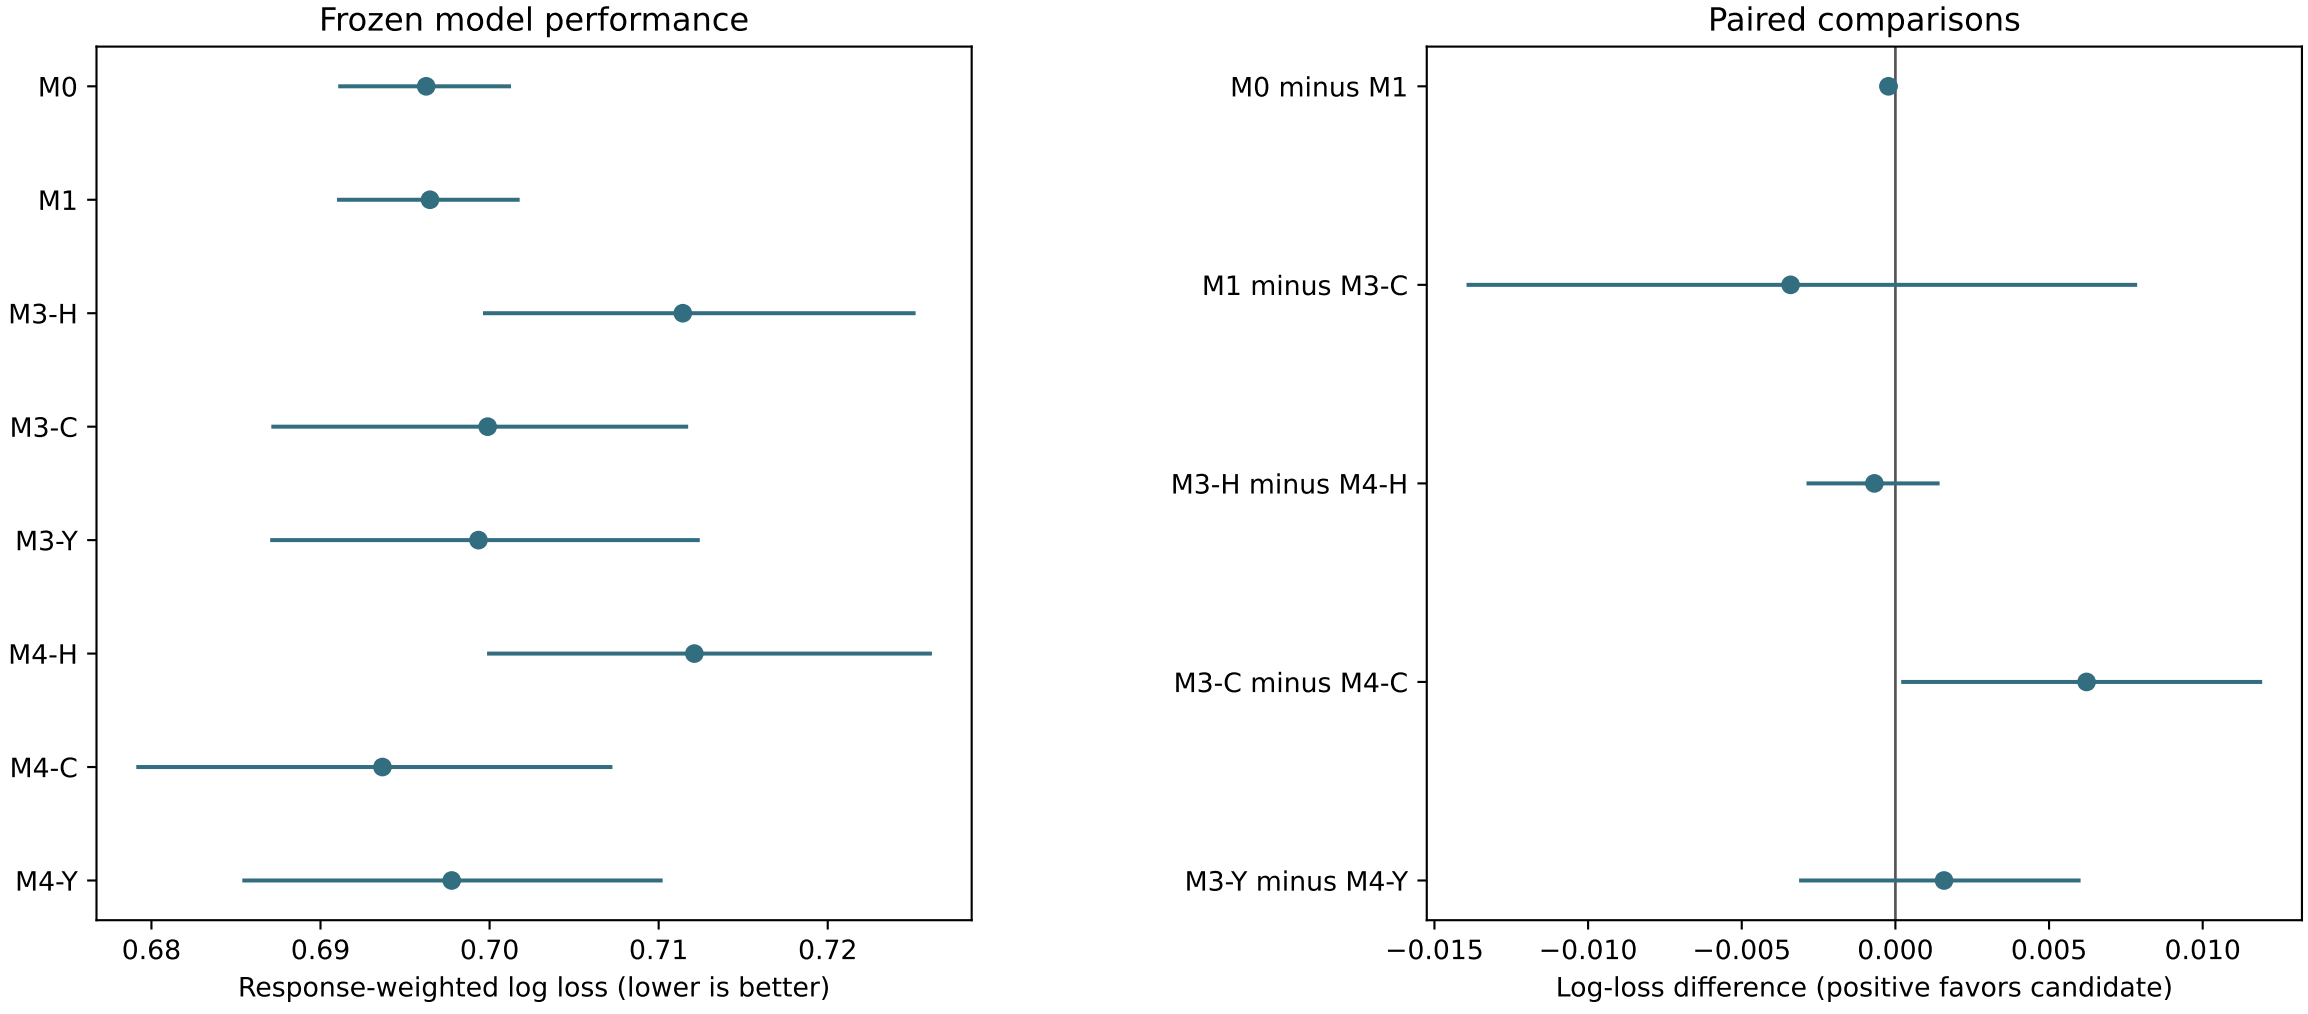
G3 within-cat subgroup: unseen photos of familiar cats

286 responses | 106 pairs | 60 held-out photos | 53 cats



M1 cat scores cancel within a cat; its prediction is a constant displayed-side intercept.

Post-test, retrospective, not independent or causal. Intervals: 95% pointwise held-out-photo bootstrap.

Shared cats, known photos, and respondents may remain dependent; intervals are not multiplicity-adjusted.
